LarePass Privacy Policy

Release Date: August 21, 2024

Effective Date: August 21, 2024

LarePass, developed by **Bytetrade Technology (Beijing) Technology Co., Ltd.**, with its registered address at **Floor 10, Unit 12-01, Building 38, Haidian Street, Haidian District, Beijing, China** (hereinafter referred to as "we" or "us"), is an application designed for users of the **Olares** system, integrating various functionalities and auxiliary management systems.

Before you download, install, and use the LarePass software (hereinafter referred to as "the Software" or "this App") and related services, please read and thoroughly understand this **Privacy Policy**. Additionally, if you are using the Software as a member of an organization, we recommend that you fully understand the relevant data collection, usage, and protection policies of your organization.

This policy constitutes a legally binding agreement between you and us. We hereby specifically remind you to carefully read and fully understand each clause of this agreement, especially those clauses that pertain to your rights, which may be highlighted in bold or underlined to draw your attention. Please carefully review and choose whether to accept this agreement. If you do not agree to the terms, please immediately stop accessing or using the Software.

This Privacy Policy includes the following content:

1. How LarePass collects and uses your personal information
2. Use of cookies and other similar technologies
3. How LarePass processes, transfers, and discloses your personal information
4. Storage of personal information
5. Protection of personal information security
6. Complaints
7. Changes to and notifications of the Privacy Policy
8. How to contact us

1. How LarePass Collects and Uses Your Personal Information

1.1 During your use of the Software, LarePass collects the following information:

- **[Android App]**
  - System language, operating system information, operating system API version, Android ID, network device hardware address (MAC address), CPU information, GAID, OAID, device serial number
  - Storage information: hard drive usage, memory usage
  - System or network identification information: IP address, cookie data
  - Network identification information: account password
  - Application information: application version, WLAN access points (BSSID, SSID), network access method, type, status, network quality data
  - Service content information: user feedback, service log information
- **[iOS App]**
  - Device information: device name, device ID, device model, operating system information, operating system API version
  - System or network identification information: IP address, cookie data; wireless network name, WLAN access points (BSSID, SSID), network access method, type, status, network quality data
  - Service content information: user feedback
- **Log information**: Information related to your use of certain features, applications, or websites, including the time and duration of service use, network request information, standard system logs, crash data, behavioral logs generated by using services or performing operations, and device and software event information.

1.2 LarePass will collect and use your personal information for the following purposes:

1.2.1 Login and Authentication

When you log in to LarePass, you will need to use your **Olares ID** and **Olares login password**. Once you input the above information, you will be able to access the Software.

1.2.2 VPN Services

To provide VPN data transmission services, authenticate user devices, and diagnose network issues, LarePass needs to access your **device information** and **network information**. The VPN service is responsible for connecting your device to the **Olares server** so that you can access Olares resources. This service does not access, intercept, or alter your content information.

1.2.3 OTP Services

The **OTP service** provides a built-in **One-Time Password** (updated every 30 seconds) and a custom password generation feature. The built-in OTP is used for **two-factor authentication** in

the LarePass system, ensuring account login security.

1.2.4 Office Security Monitoring

To offer office security monitoring services, LarePass may need to perform a local security scan on your device to provide security risk alerts and security setting suggestions, such as setting a lock screen password. Rest assured, LarePass will not read or use the content of your local files.

1.2.5 Security Assurance Features

LarePass is committed to providing you with a secure and reliable product and usage environment. The following information is collected to achieve security assurance features is necessary information.

a. To ensure the secure operation of the software and services, LarePass will collect your **hardware model and settings**, **operating system information and version number**, **Android ID**, **network device hardware address**, **CPU information**, **storage information**, **IP address**, **WLAN access points**, **network access method**, **type, status, and network quality data**, as well as **operation, usage, and service logs**.

b. To prevent malicious programs and ensure safe operations, LarePass will collect information on **installed applications or running processes**, **overall application performance**, **usage patterns and frequency**, **application crashes**, and **performance data**.

c. LarePass may use your **account information**, **device information**, and **service log information** to assess account security, perform identity verification, and detect and prevent security incidents

1.2.6 Statistical Analysis

To analyze the performance of the product and improve user experience, LarePass may use your **device information** and **log information**. The aforementioned information will be anonymized and will not be linked to your personal identity.

1.2.7 Scan Function

To provide you with the scan function, LarePass will request your authorization for **camera access**. If you refuse to grant this permission, you will be unable to use the scan function, but it will not affect your normal use of other features of LarePass.

1.2.8 Performance Monitoring Services

To provide you with services for device anomaly detection and performance analysis, as well as for device identification, status monitoring (online, offline, network environment), device count statistics, and single-device issue debugging, the following necessary information is collected:

- **Device Information**: device ID, device model, operating system, system timezone, screen resolution, disk usage, memory usage, number of running threads, CPU information (frequency, model, architecture), mobile country code (MCC), mobile network code (MNC), device DPI;

- **Android**: Android ID, device brand, operating system API version, user agent, battery level, network traffic, device ABI, ROM;
- **iOS**: Jailbreak status, identifier for vendor (IDFV).

- **Application Information**: application version, package name, process startup time, crash time, crash thread name, names of visited pages, complete thread stack of the current process, application service log information, application file names, application file sizes, disk size;
  - **Android**: file descriptor (FD) list;
  - **iOS**: in-app language, app distribution channel.

System and Network Identification Information: user ID, IP address, carrier information, network access method.

1.3 LarePass Permission List

Android

Permission Name	Permission Function Description	Usage Scenario or Purpose
CAMERA (Photo/Video Capture)	Use the camera to take photos and videos, scan QR codes	Provide scan function
READ_EXTERNAL_STORAGE (Read External Storage)	Access content in the gallery	Add OTP service by scanning local gallery images
ACCESS_FINE_LOCATION (Access Precise Location)	Obtain precise geographic location via GPS or network-based data (e.g., cell towers and WLAN)	Provide one-click WiFi connection service with dynamic usage
BLUETOOTH (Bluetooth)	Used to access device information	Identify terminal devices

iOS

Permission Name	Permission Function Description	Usage Scenario or Purpose
NSPhotoLibraryUsageDescription (Access Photo	Access content in the gallery	1. Use WebView component features 2.

Library)		Add OTP service by scanning local gallery images
NSCameraUsageDescription (Use Camera)	Use the camera	Provide scan function
NSLocalNetworkUsageDescription (Access Local Network)	Access the local network	Ensure secure operation of software and services

2. Use of Cookies and Other Similar Technologies

LarePass uses cookies and other similar technologies (such as web beacons, Flash cookies, etc.) (collectively referred to as "Cookies") to enhance your experience while using this software. When you use LarePass and related services, LarePass may use relevant technologies to send one or more cookies or anonymous identifiers to your device to collect and store information about your access and use of this product. Most web browsers automatically accept cookies, but the decision to accept them is entirely up to you. You can choose to accept or disable cookies. You understand and agree that LarePass may store necessary cookies required for the operation of this software, including those that allow you to log into the secure areas of the software. The storage of these necessary cookies is a prerequisite for providing basic service content; if you do not agree to this authorization, you will be unable to use any services of this software.

3. How Your Personal Information is Processed, Transferred, and Disclosed

Your organization determines how to process, transfer, and publicly disclose your personal information. For specific details, please communicate with your organization. If your organization uses Olares's public cloud services, you agree that your organization will delegate us to process your personal information. We place a high priority on the protection of personal information, and we will process your personal information according to your organization's requirements.

4. Storage of Personal Information

Your organization determines the method, location, and duration of storage for the aforementioned personal information, as well as the handling of such information upon expiration. For specific details, please communicate with your organization. If you are using a personal Olares device, the information will be stored on your Olares device.

5. Protection of Personal Information Security

5.1 We take the security of your personal information very seriously. We implement strict security technical measures on the client side to prevent unauthorized access and modification of your personal information, and to avoid data corruption or loss.

5.2 Security Limitations

Although we have implemented the above measures and have complied with the standards required by relevant laws and regulations, please understand that due to technological limitations and the potential for various malicious attacks in the internet industry, it is impossible to guarantee 100% security of information, even with the utmost efforts to enhance security measures. We will do our best to ensure the security of the personal information you provide to us. Please be aware and understand that the systems and communication networks you use to access our services may encounter issues due to factors beyond our control. Therefore, we strongly recommend that you take proactive measures to protect the security of your personal information, including but not limited to using complex passwords, regularly changing passwords, and not disclosing your account password or other personal information to others.

5.3 For information regarding the data protection measures and security protocols implemented by your organization, please contact your organization for further details.

6. How to View, Back Up, and Delete Your Account Information

6.1 View and Back Up Your Account

Go to **LarePass** > **Settings** > **Account** to view, copy, or back up your account information.

6.2 Delete Your Account

After you stop using the software, you can request account deletion by contacting your organization's administrator or emailing support@bytetrade.io.

7. Complaints

If you wish to contest or file a complaint regarding our handling of your personal information, please contact the user administrator immediately.

8. Changes and Notifications of this Privacy Policy

To provide better services to your organization and you, the functionalities of LarePass will change from time to time. We will revise this Privacy Policy accordingly, and these revisions will

form part of this Privacy Policy.

To help you understand any changes in LarePass's data processing practices, after updating the privacy policy, we will issue the updated version on this software platform and notify you of the relevant updates through client announcements or other appropriate means before it takes effect, so that you can stay informed about the latest privacy policy.

9. How to Contact Us

If you have any questions, comments, or suggestions regarding this privacy policy, you can contact us through the following channels:

- Log into our official website and scan the QR code in the footer to join the official support channel on Discord or WeChat.

- Email us at support@bytetrade.io (this email address will be updated periodically and published as part of this policy).

We will process your request promptly upon receipt and respond to your inquiry within 15 working days or within the timeframe required by laws and regulations.
